

# iV infusion

## ELITE iV'S

### immunity

**b complex + vitamin c + zinc sulfate**

Immune support is excellent for anyone who wants to prevent illnesses such as the cold and flu. It also helps with recovery time if you become ill with a cold or flu.

### myers pro

**b12 + b complex + calcium gluconate + magnesium chloride + L-tyrosine + vitamin c + zinc sulfate**

Great for the overall health and wellbeing of the guest. This cocktail helps with headaches, muscle cramps, allergies, depression, cold and flu, boosts energy levels, and much more!

### #illneverdrinkagain

**b complex + L-tyrosine + magnesium chloride + tramadol + zofran**

Created as the quintessential hangover formula that will rejuvenate anyone's "last night" experience.

### beautify

**biotin + glutathione + vitamin c**

Designed to focus on promoting the health of your skin, hair, and nails. This is especially helpful for patients who want the ultimate improvement in how they look and feel.

### supa gluta

**high-dose glutathione**

Potent antioxidant with the ability to boost immunity and energy along with aiding in the decrease of symptoms in many cardiac and nervous system disorders.

### hi-C

**saline + high-dose vitamin c**

Vitamin C is essential for the growth, development, and repair of body tissues. It's involved in body functions, including formation of collagen, absorption of iron, the immune system, wound healing, and the health of cartilage, bones, and teeth.

### quickslim pro - PS

**b12 + b complex + bi-amino + biotin + glutathione + glycine + L-carnitine + lysine + taurine**

Designed to aid with weight loss and improve exercise performance. L-carnitine is a naturally occurring amino acid that helps the body turn fat into energy, improves exercise tolerance, and enhances metabolism.

## build-a-bag

1,000mg lactated ringer

A member of our clinical team will help guide you towards a truly personalized IV Infusion that meet **YOUR** needs

Keeps the body's blood & nerve cells healthy. Helps the metabolism & weight loss.

### bi-amino

Helps the liver, fights fatigue, and reduces muscle breakdown.

# semaglutide

## semaglutide - PS

Semaglutide is an FDA-approved prescribed injection to help people medically manage their chronic weight. This is an excellent option for guests with a BMI of 27 or higher that suffer from weight-related health issues.

### benefits:

- boosts weight-loss
- decreases cravings
- lowers appetite
- increases sensation of fullness
- slows gastric emptying
- regulates blood sugar

### how it works:

For the principles of weight loss, the GLP1 agonist works in the body by causing delayed gastric emptying, thus, increasing the sensation of "fullness" and decreasing appetite/cravings.

### Common side effects may include:

*Nausea, diarrhea, vomiting, constipation, headache, fatigue, dyspepsia, dizziness, abdominal pain, flatulence, gastroenteritis, GERD, gastritis, alopecia, injection site reaction.*

## semaglutide pass

for medically managed weight loss  
iCRYO offers a monthly pass to help guests with BMI of 27 or higher lose and manage their chronic weight.

### how it works:

Prescribed injections are administered one time a week. Dosing increases are at the discretion of the medical provider and guest weight loss achievements and side effects.

### recommendations:

The recommended initial period is a 5-month process to hit your weight loss goals.

### maintenance program:

Guests may continue with a month-to-month maintenance semaglutide pass until achieving their desired weight.

*All iV's, Boosters & iM Shots are available in  
Single, 5pk, 10pk, 15pk, 20pk*

*\*PS = Patient Specific*

# NAD+ Therapy

## NAD+ Therapy - PS

NAD+ is found in every cell in your body and aids in rejuvenating the age and health of a person. It works by improving the cellular processes at the mitochondrial level within the cell.

### benefits:

- brain function
- anti-aging properties
- better sleep
- reduces depression
- improves stress
- boosts energy

### recommendations:

We recommend you receive a Myers or similar infusion on the day of your consultation to optimize your nutritional status prior to NAD+ Therapy.

### NAD+ load up option #1

5 consecutive days of NAD+ followed by a maintenance program.

### NAD+ load up option #2

5 consecutive weeks (1/wk) of NAD+ followed by a maintenance program.

### maintenance programs:

- One NAD+ per week
- One NAD+ bi-weekly
- One NAD+ per month

### dosage levels:

#### iV INFUSION

- 250mg
- 500mg
- 750mg
- 1,000mg

#### iM SHOT

- 100mg

# Ozone UV iV Therapy

**Ozone UV iV Therapy** is the act of drawing your blood, injecting it into a bag of saline, mixing it with ozone (O<sub>3</sub>), and administering it back into the body through an iV. As the blood passes through the iV, it is treated with UV light to destroy bacteria and virus pathogens.

### benefits:

- enhances immune system
- decreases chronic pain
- body detoxification
- increases blood circulation
- improved nutrient distribution
- better sleep

### how it works:

#### SERVICE TIME: 30 - 60 MINUTES

Ozone is an immunomodulator that helps regulate and enhance your immune system. Increasing the amount of oxygen in your bloodstream allows your body to create more energy. In addition, as your enriched blood passes through the iV, UV light destroys bacterial, fungicidal, and virucidal pathogens before it returns to your body, further enhancing the immune system.

### recommendations:

Five consecutive weeks (1 x week) of Ozone UV iV Therapy followed by a maintenance program.

### maintenance program:

One Ozone UV iV Therapy treatment a month, maximum frequency every 14 days.
